## **ABSTRACT**

From 1955 to 1972, injection well TSF-05 at the Idaho National Engineering and Environmental Laboratory Test Area North facility was used for wastewater disposal. Tests from 1987 to 1990 and in 1992 and 1993 confirmed that TSF-05 is a source of trichloroethene, tetrachloroethene, and 1,2 dichloroethene contamination in the groundwater surrounding the injection well (the hot spot) and in a plume downgradient of the well. Other contaminants of concern (for example, strontium 90 and tritium) have also been detected.

To reduce risk to human health and to prevent future residents from ingesting contaminated water, the hot spot and the plume will be remediated by 2095, 100 years after the date of the Record of Decision signature, which was August 4, 1995. During the first phase of remediation, contaminated water from the hot spot was pumped, treated, and then reinjected into the Snake River Plain Aquifer. During the next remediation phases, hot spot, medial zone, and distal zone, remediation will continue.

The areas to be remediated are part of operable unit 1-07B. To eliminate or minimize health and safety risks to workers during remediation, the Occupational Safety and Health Administration requires a health and safety plan, and this plan fulfills that requirement.

## CONTENTS

ABSTRACT .....	iii
ACRONYMS AND ABBREVIATIONS .....	xi
1. INTRODUCTION.....	1-1
1.1 INEEL Site Description.....	1-1
1.2 Project Site Description.....	1-2
1.3 Scope of Work .....	1-5
1.3.1 Hot Spot Containment and/or Removal.....	1-6
1.3.2 Treatability Studies.....	1-8
1.3.3 Phase C—Groundwater Restoration Activities .....	1-8
2. KEY PROJECT PERSONNEL RESPONSIBILITIES .....	2-1
2.1 Nonfield Support Staff.....	2-1
2.1.1 WAG 1 Project Manager .....	2-1
2.1.2 WAG 1 OU 1-07B Project Manager .....	2-3
2.1.3 Project Engineer .....	2-3
2.1.4 WAG 1 SH&QA Point of Contact.....	2-4
2.2 Project Personnel .....	2-6
2.2.1 WAG 1 OU 1-07B Field Construction Coordinator.....	2-6
2.2.2 OU 1-07B Field Team Leader .....	2-7
2.2.3 Subcontractor Supervisor .....	2-7
2.2.4 Sampling Team.....	2-8
2.2.5 Health and Safety Officer .....	2-8
2.2.6 Nonfield Team Members/Visitors .....	2-9
2.3 TAN Support Staff.....	2-10
2.3.1 TAN Site Area Director.....	2-10
2.3.2 Facility Manager/Landlord .....	2-10
2.3.3 Radiological Engineer .....	2-10
2.3.4 Radiological Control Technician.....	2-10
3. RECORDKEEPING REQUIREMENTS .....	3-1
3.1 Industrial Hygiene and Radiological Monitoring Records .....	3-1
3.2 Project and Site Attendance Logbooks.....	3-1
3.3 Administrative Record and Document Control Office.....	3-1
